

Here's what was **promised** to our fishing fleet...

'The project reflects the vision of the Spit Master Plan for Carters Basin... enabling the daily catch to be sold direct to the public in a convenient and ordered manner.'

~ *Spit Master Plan, May 2019*

'The fishermen have operated from this area for several generations.'

We wanted to make sure that the proponents (for the tender) supported the Fishermen's Co-op to continue there in the future.'

~ *Jarrod Bleijie,*
Deputy Premier & Minister for State Development,
17 Dec. 2025

The Co-op was promised a fully operational facility.

But, the redevelopment plans fail to deliver.

1. The site allocated by the State Government is far too small to allow a commercial fishing operation.
2. The new plans require customers to pay for underground parking with a long complicated walk to the trawlers.
3. The huge rent increase for the Co-op will make the price of seafood unaffordable.

What does the Co-op need to survive?

The plans must be modified so that the Co-op can operate safely and give customers the authentic seafood experience that they love.

Please email the Hon. Jarrod Bleije with your concerns that you will no longer be able to buy your fresh seafood direct from the trawlers.
